CAN WE MAKE A SUPER SOLDIER?

★ ★ ★ ★ ★ ★ ★ ★ ★ ★

In E. Paul Zehr's new book *Chasing Captain America*, he explores how we could use science to theoretically make Captain America a reality today.

SHAPE

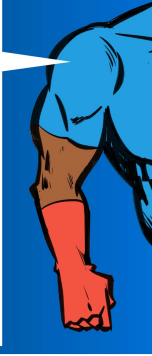

Optimally modify our physiology and metabolism.

BENEFITS

Like a freediver you could dive under water with no air tank for 20 minutes! Or, you could potentially run as fast as an Olympic sprinter for as long as a marathoner!

HOW

Regulate hormones with testosterone, cortisol, growth hormone, insulin, and steroids.

MOVEMENT

Increased size, muscle mass, bone density, strength and general robustness.

BENEFITS

You could have the strength of a weightlifter and the agility of a gymnast - think parkour on steroids!

HOW

Stem cells, increased myostatin (a muscle building growth factor), epigenetic changes, hormones like endorphins and adrenaline.

MIND

Increased memory, cognition, and general intelligence.

BENEFITS

Cognitive enhancements and virtual training could allow you to become an advanced black belt in days not years.

HOW

Brain-stimulating drugs, combined with cybernetic virtual training.

LONGEVITY

Slow aging, speed healing and regeneration.

BENEFITS

You could stay youthful, powerful, athletic and strong into your 90s!

HOW

Cellular senescence manipulation so cells don't age, decline in function and die. Genes for cellular regeneration which speed healing from bumps, bruises and wounds; and cryogenic suspension.

★ ★ ★ ★ ★ ★ ★ ★ ★ ★

SIDE EFFECTS

"It's pretty crippling actually the kinds of things that happen," says author E. Paul Zehr on damage to the body.

So for your own safety you may want to wait for scientists to actually develop super-soldier serum and vita-rays.
